Debugging

MY GAME DEVELOPMENT HISTORY

- ✖ Started game development in 2005
- ✖ Questions asked:
 - + What tools are out there?
 - + What do I need to know to develop a 3D computer game?
 - + What about XBox games? Playstation, Wii (recently)
 - + Where do I find these things?
- +Google search!!!**
 - ✖ Google is now a verb in the Oxford English Dictionary!

GOOGLE SEARCH!

× Search “3D game development tools”

Engines/Authorware for Non-Programmers

- 2D Shooter Game Creator The 2D shooter game creator will let YOU create your own games, in the style of classic lightgun games, e.g. Time Crisis
- 3D Adventure Studio an editor for creating adventure games in style of Gabriel Knight 3 (WIN)
- 3DCakeWalk allows the development of commercial quality games with all the "state of art" features you will find in today's leading games
- 3D Game Engine alpha release of an unfinished 3D game engine (DOS/GNU/Linux)
- The 3D Game Maker point & click 3D game creator (Win)
- 3D Game Studio produce 3D realtime applications - demos, adventures, role playing, action, advertising, or racing games - without programming skills (WIN)
- 3D Rad a programmable, user-friendly, 3D real-time engine (WIN)
- Abstract RTS Engine An RTS engine under development intended for user-produced rules, AI, and media modules (mods)
- ADePT adventure developing and playing toolkit
- ADRIFT a simple, yet powerful IF game designer (WIN)
- Adventure Book CYOA creator
- Adventure Builder text adventure authoring system (DOS/WIN)
- AdventurEd system in development for creating graphical adventure games (Amiga)
- Adventure Game Engine engine for creating graphical first-person adventure games with full support for inventory, save/load games, inventory, puzzles, conversations, full motion video, cutscenes (WIN)
- Adventure Game Studio make your own point and click adventure games without programming: recently rewritten, now supports the

-
- ✖ Too many products out there!
 - ✖ Some free and some not...
 - ✖ Which one do I choose? What will my students' learning curve be? Etc..
 - ✖ So, categorized them
 - + Game Development Tools
 - + Implementation tools

GAME DEVELOPMENT TOOLS

× 2D game development tools

+ Game Editor

- × interactive multimedia tool for game development
- × simple and intuitive interface
- × develop 2D games for personal computers and mobile devices!

+ Sphere

- × 2D RPG (Role Playing Game) engine
- × allows people with not much programming experience to create role-playing games

3D game development tools

× *3D Game Maker*

- ★ uses a point and click interface
- ★ simple to use
- ★ allows one of 8 genres
- ★ pick from pre-made characters
- ★ good for developing games by changing set capabilities

× 3D Gamestudio

- ★ number of versions with increased capability
- ★ development system for virtual worlds, simulations and 2D and 3D computer games.
- ★ combines lite-C programming language and
 - × a high end 3D engine and a 2D engine,
 - × a physics engine,
 - × level, terrain and model editors,
 - × a template system for creating games without programming, and
 - × huge libraries of 3D objects, artwork and ready-assembled games.

GAME IMPLEMENTATION TOOLS

× Game Environment Creation + 3D Rendering systems

× Autodesk 3Ds Max

- × generate realistic characters
- × create rich and complex design visualization
- × used for shading, texturing, lighting, and rendering on projects ranging from feature films to television commercials to music videos

Jade Empire - Bioware

× Autodesk® Maya®

- × software is a powerful, integrated 3D modeling, animation, effects and rendering solution
- × used for modeling and creature work

Star Wars: Knights of the Old Republic - Bioware

Forza Motorsport - Microsoft

Gaming Engines

- × Delta3D (open source)

- ★ Full gaming engine
- ★ Includes 3D environment editor

- × **GarageGames' Torque**

- ★ whole game development approach
- ★ provide the technology, framework, methodology, tools where you provide the creativity and the drive to make your game.

- × Irrlicht Engine (free)

- ★ open source high performance realtime 3D engine
- ★ written and usable in C++
- ★ completely cross-platform, using **Direct3D** and **OpenGL**
- ★ character animation system
- ★ powerful, customizable and easy to use **2D GUI System** with Buttons, Lists, Edit boxes

Gaming Engines for console game development

- × Microsoft's XNA Game Studio Development Express (free),

Microsoft

- × cross platform Next generation Architecture
- × will enable any one to make a game for the Xbox 360 and Windows XP platforms.
- × developed games can be distributed with the free XNA Framework to be able to run the games

- × idTech2 (Quake 2 gaming engine)

- × open source
- × 3D environments
- × software renderer
- × colored lighting effects

-
- × The UnrealEngine2 Runtime: Demo Version
 - * for non-commercial and educational use
 - * cross-platform, real-time 3D rendering solutions
 - * Runtime provides a stable, robust platform for interactive walkthroughs and simulations.

 - + CPR Tool

CURRENT PROJECTS

MATERIALS EDUCATION GAME ENVIRONMENT

- ✖ Materials Education Game (MEG) environment is an environment that was developed for use in a Materials Science educational game.
- ✖ This environment uses the principles of gaming for teaching a core concept in Materials Engineering.
- ✖ Autodesk's 3dsMax was used for the graphics generation and animation.

- × Implementation Tools
- × Materials Education Game Environment
- × Virtual Cleanroom
- × E-learning as game-like environments
 - + CLDT
 - + CPR Tool

E-LEARNING

× E-learning as game-like environments

- + Take a fully functional e-tool and add a timer: for example, creates a game-like environment where students can use the tool to see how quickly they can answer the questions.
- + Creates a competitive environment while at the same time assessing the student knowledge.
- + Also, providing success rate allows use in the classroom by teachers for assessment.

COMBINATIONAL LOGIC DESIGN TOOL (CLDT)

- ✖ CLDT implements a novel approach to online learning which is the development of *web-based online practice tools*.
 - + randomly generate problem statements
 - ✖ (not randomly choose from a list) and
 - + allow students to solve problems through a step-by-step process
 - + Assess responses at each step 'Just In Time' (JIT)
- ✖ Built using Adobe Macromedia Flash ActionScript
- ✖ Portable and web-based → available any time, anywhere

CLDT USER TOOL OPTION

Demonstration

OTHER E-TOOLS DEVELOPED

- ✖ Chain and product rule tools (college calculus level)
- ✖ Again, adding timers and providing success rate make for a game-like environment

Simulation

Chain Rule Novice

Home Tutorial Manual

$$(7x^2 + 6x^6)$$

1. Enter values for (u) ?

$u = (7x^2 + 6x^6)$

Submit Reset

2. Differentiate $f(u)$ and $f'(u)$?

$f(u) =$

Submit Reset

$f'(u) =$

Submit Reset

3. Since $u = g(x)$ differentiate $g'(x)$?

$g'(x) =$

Submit Reset

4. Complete the Chain Rule?

$f'(x) =$

Submit Reset

HINT: Given $R(x) = (4x^2 + 2x + 1)^4$

then $u = g(x) = (4x^2 + 2x + 1)$

OK

Achieving with excellence...

Options:

Chain Rule Intermediate

New Equation

Reset All

$$(x^4 - 9x^2)^3$$

1. Enter values for (u)?

$$u = (x^4 - 9x^2)$$

2. Differentiate $f(u)$ and $f'(u)$

$$f(u) = (u)^3$$

$$f'(u) = 3(u)^2$$

3. Since $u=g(x)$ differentiate $g'(x)$?

$$g'(x) =$$

4. Complete the Chain Rule?

$$f'(x) =$$

Warning

You must enter some acceptable inputs before you can proceed.

Acceptable inputs include:

0 1 2 3 4 5 6 7 8 9

* + () u ^

Please recheck the values entered.

Achieving with excellence...

Options:

Chain Rule Intermediate

New Equation

Reset All

$$h(x) = (5x^6 - x)(3x^2 + 9x^3)$$

1. Enter the vlaues for u and v?

u=

v=

2. Differentiate du/dx and dv/dx?

du/dx=

dv/dx=

3. Enter the values for (u) * dv/dx and (v) * du/dx?

(u)*dv/dx=

(v)*du/dx=

4. Complete the Product Rule?

(uv)*d/dx=

HINT: Given $y=(x-2)(x-1)$

then $u=g(x)=(x-2)$

Achieving with excellence...

Options:

Chain Rule Novice
